### **Standard and Low Profile Niobium Oxide Capacitors**

#### **FEATURES**

- · Non-Burn Safe Technology
- Reliability Level: 0.5%/1000 Hours at 85°C
- 100% Surge Current Tested
- 5 Case Sizes Available, Standard and Low Profile
- Environmentally Friendly, RoHS Compliant
- CV Range: 4.7-470µF / 1.8-10V
- · Elektra Component of the Year Award, 2005

# LEAD-FREE COMPATIBLE COMPONENT

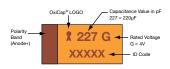

Elektra Award 2005

### **APPLICATIONS**

- Automotive, Avionics, Digital, FPGA, Industrial Low Voltage **Control Circuits**
- Downsized Industrial and Automotive DC/DC Converters

### **MARKING**

#### A. B. C. D. Y CASE

### STANDARD CASE DIMENSIONS:

### millimeters (inches)

Moisture Sensitivity Level (MSL) is defined according to J-STD-020.

All technical data relates to an ambient temperature of +25°C. Capacitance and DF are measured at 120Hz, 0.5V RMS with a maximum DC bias of 2.2 volts. DCL is measured at rated voltage after 5 minutes.

The EIA & CECC standards for capacitors allow an ESR movement to 1.25 times catalog limit post mounting.

For typical weight and composition see page 259.

NOTE: KYOCERA AVX reserves the right to supply higher voltage ratings in the same case size, to the same reliability standards.
